## Internship

Internship on Android Development(Emglitz Technologies).

## Area of Interest

Java

Full Stack Mobile Development(React Native & Django).

## Projects

**Bankingbot**
Trained Query Response System is a cutting-edge project aimed at revolutionizing customer service within the banking sector. Leveraging advanced Natural Language Processing (NLP) techniques and machine learning algorithms, this system is designed to intelligently interpret and respond to a wide range of queries posed by customers through both text and voice interactions.
